Test Description

This Cascading Style Sheets 3.1 assessment is designed to verify the test taker's general knowledge of using CSS 3.1 for Web site design. This test measures the test taker's comprehension of browser-specific implementations as well as properties that target the experience layer within a browser. There is also a heavy emphasis on the understanding and interpretation of CSS 3.1 code. Topics covered on this assessment include animation, movement, transformations, corners, colors, backgrounds, shadows, reflections, masks, styling forms, and CSS fundamentals. This assessment is appropriate for intermediate and advanced users a year or more experience. An assessment for HTML 5 is also available
